## Lithium-ion battery automatic batching system

### Overview of the feed system:

Lithium-ion battery automatic batching system is our company's intelligent production system that is specially designed for the raw material of slurry materials for automatic batching and feeding according to the development requirements of the industry.

The system consists of a metering system, a powder feeding and conveying system, a computer control system, a storage material and a transit buffer tank system. The entire system implements automatic conveying and metering. It adopts imported high-precision weighing modules and meters, measuring accuracy can reach three thousandths, greatly improving the efficiency and accuracy of the ingredients, more effectively insulating the air, preventing the deterioration of the materials, and improving the production workshop. surroundings.
